About This Game

Evolution Planet: Gold Edition is a tactical puzzle game about adaptation and survival.

Strategic fun!

Combine creatures in groups of three so they turn into a single stronger creature. Discover new transformations while you face the dark side of evolution in battles that will put all your *strategic skills* to the test.

Easy to play, hard to master.

Evolution Planet Gold is a *twist* of the usual match-3-games. It is more *tactics-focused*, fairer and more challenging for the

player. In Evolution Planet Gold you cannot just move without having a clear idea of where you are going. *Planning ahead* and being able to respond to any given set of circumstances are crucial.

More than meets the eye...

It features *two game modes*, each of which takes advantage of the game mechanics in its own way. The objective on the *Campaign mode* is to make your way along the map overcoming the *challenges* on each level, unlocking new islands and bonus levels, and fighting battles against final bosses." The *Survival mode* is a potentially *infinite game* level with an unlimited number of creatures, where the most important thing is strategic freedom when it comes to facing the hordes of mutant enemies.

A fun, casual strategic adventure puzzle experience for all ages:

- *Pure fun for everyone*. You will love Evolution Planet, your sister will, your dad will beg you to let him play, your grandma will beat your Survival mode highscore, your kids will prepare your breakfast if you let them play...
- Stunning audiovisuals with *beautiful* animations, settings, atmospheric effects and a delightful soundtrack adapted to each situation.
- Two different game modes: *Campaign*, with more than 90 levels on 6 islands, and *Survival*, with endless gameplay.
- Each level offers a *different challenge*: evolve, eliminate enemies, set your allies free, defeat final bosses, play against the clock...
- Special items and power ups such as the DNA and the meteorites let you use *alternative strategies* to overcome the challenges.

Evolution Planet: Gold Edition is available as a one-time upfront payment game and it does not have in-game purchases, ads, or any other type of freemium-like components.

ENJOY!

A sequel to Xblaze Code: Embryo, this game was a pleasant surprise.

Code: Embryo was, in my opinion, a reasonably decent read despite its cliches and other issues. This game, Lost: Memories, presents itself as a much more unique experience that not only builds upon and improves the previous game's story, but also throws a few surprises that fans of BlazBlue will certainly appreciate.

While I was a bit disappointed with the ending, the journey was definitely a worthwhile one. Recommended for anyone who read Code: Embryo or simply wants to delve further into the world of BlazBlue.. Do not buy this piece of♥♥♥♥♥♥ the controls are frustrating and unresponsive.. While this game is certainly not a real simulation, it is a ton of fun. Great arcadey ship to ship battles, many ship choices and varied tasks all make this a great game.. I found this game via youtuber doing a lets play. I have been enjoying the game and am hopeful for future updates. I recommend the game to those who like crafting/combat games. Be ready for a difficult game, but in a good way. Explore different routes and crafting chains. Here is a youtube let's play that is currently active for those interested.

<https://www.youtube.com/playlist?list=PL7vVwkBJ5wTwy9PliuUrX7owi0Uxx92vm>. Godawful grabbing mechanic and floaty physics lead to a very fidgety and imprecise mess. It's hard for all the wrong reasons.. It doesnt work! When i tried to record fullscreen stuff it only recorded my voice! the screen was black. And when i tried to record windowed games the video was glitched out and it was 10 seconds long even when i recorded 20 min vids!
Dont buy it! its a waste of money! There are so many better recording softwares than this...nevermind. It doesnt work with Garrys Mod doesnt work with Gang Beasts only worked with browser games like happy wheels!. Melbourne Intl. Amazing first time I've played a game and thought it was worth loads more. It's got quality about it too.I hope they keep improving it

its a fun game that i would like to see grow. best part is i can play with my vive and my frends can play with their MKB. We need more games like this!. Holy heck.... BUY THIS GAME while it's \$2.50 or whatever.... what a FUN game. Unique artstyle and music but just a typical story nothing too fabulous but it's simple enough to make a decent tale BUT it doesn't end satisfyingly. Like it REALLY ends on an unsatisfying note for that I kinda recommend against it.

As a VN:

5.5/10. This game is looking promising

Iv been looking for a game like this for some time but there are some tweak to be done and some things that could be changed but other than that if you keep on going on the same path its going to be a really good game. Usually very cheap indie games on Steam is reserved for the worst that indie devs have to offer or at it's best a game you'll play a couple times then forget you ever had. But despite being a very cheap indie game this game fits neither and is actually really good. Think of a 2D, Vector Graphics, Top-Down view version of Wipeout. And if that sounds good to you then I would certainly recommend buying this and even if you're not a Wipeout fan I would still recommend this!. Great graphics. Wonderful music. So-so is story. The Korean-style grinding was noticable at middle and went exponentially at the end. The community is somehow not many thus making running dungeon is hard.

Recommend to waste some of your time on it. Not worth when you have reached the paywall.. This was a lot of fun.. Fun little green platformer. Foxes having a picknik, hunters come ruin it.. first Fitz has to go save Fiona.. with platforming and jumping, then your Fiona trying to save Fitz, with a gun (which you use to jump around, as well has the obvious shoot enemies)

But once you've beaten the second boss, you have the choice to do the 3rd stage areas (plus boss) as which you choose. Fitz is much easier, and i mean MUCH easier. I spent a few hours trying to get past Fiona's before giving up, restarting the whole game and got to the final boss in around an hour.

So, if you like a super challenge, try to even get to the final boss as Fiona.

Overall, i liked it, it was a fun, potentially short indie platformer ^^ With Foxes ^^
